

Our Management Commitment

Silfab Solar is one of North America's leading solar manufacturers, specializing in the design, engineering, and advanced manufacturing of high-performance solar cells and premium solar panels. With more than 40 years of solar expertise, Silfab has built a reputation for quality, innovation, and reliability, earning the trust of utilities, commercial developers, residential installers, and several Fortune 100 companies across North America. Our premium solar panels help America reshore energy capacity while generating reliable, renewable clean energy.

At Silfab Solar, the safety and well-being of our employees and our neighbors is our top priority, and that commitment remains absolute. Many of our employees live, work and raise children proudly in this community.

Following a comprehensive, thorough, independent review by TRC Engineering, we are proud that our existing safety systems and operational controls were confirmed to meet or exceed regulatory standards. Taking that a step further, we acted decisively to implement additional recommendations, strengthening system redundancies, enhancing real-time monitoring, and advancing our emergency response coordination. We invite you to learn more about the report at www.silfabsolarsc.com.

As we move forward with a careful and phased continuation of this production line within our Fort Mill facility, I am reminded why Silfab chose Fort Mill for this important opportunity. Fort Mill is a forward-thinking community where advanced U.S. production brings tangible growth in a community with leading schools and a well-educated populace. Silfab is leading the effort to strengthen the American energy landscape by reshoring high-tech jobs in solar cell and solar panel production, bringing skilled jobs back to the U.S., and powering our country's growing energy needs.

We view our enhanced commitment to continuous improvement, environmental stewardship, and open communication not just as operational goals, but as our daily commitment to you. Thank you for your continued partnership as we power the future together safely, transparently, and responsibly.

On behalf of the hundreds of dedicated Silfab employees in South Carolina and across the United States, I look forward to providing our community with more updates and continued transparency of our operations.

Sincerely,

Paolo Maccario
President and CEO
